

Nuo Jin

AI Agent Developer · Data Analyst

+46 737 643 867 jinnuonoel@gmail.com technuo.github.io Tackelvägen 18, 865 31, Alnö

PROFESSIONAL SUMMARY

Developer and e-mobility engineering student with expertise in:

- Full-stack SaaS development and AI integration
- Data analysis for retail, e-commerce, and commercial real estate

WORK EXPERIENCE

Founder — Cardify.tech 2025 – · AI Agentic Knowledge Card Visualization SaaS

- Founded and developed a SaaS platform that transforms text into interactive knowledge cards using multi-agent AI collaboration.
- Built full-stack architecture with Next.js 14, TypeScript, Supabase, PostgreSQL, Stripe.
- Designed a 3-agent AI workflow integrating Google Gemini API.
- Implemented real-time AI collaboration visualization, subscription management, and enterprise security.
- Expanding with RAG-powered knowledge management features.

Founder — kafeAI.tech 2025 – · Small Business Management SaaS

- Developed full-stack SaaS with Next.js, React, MongoDB; integrated Gemini API for business analytics and inventory management.
- Built responsive dashboards; reduced costs 30–40% and waste 50–75%.

Co-Funder, Restaurant Manager — Tant anci och Fröken Sara AB 2019 –

- Assume full responsibility for maintaining the restaurant's quality standards and financial performance.
- Develop and manage the menu, supervising all kitchen operations and procurement processes.
- Coordinate staff scheduling and assignments.
- Ensure rigorous standards for cleanliness, hygiene, and food safety across all areas of the restaurant.
- Oversee culinary execution and enforce comprehensive sanitation protocols.

Co-Founder & GM — Milu AB 2016 – 2019

CORE SKILLS

Python	TypeScript	Next.js	React
Node.js	Supabase	PostgreSQL	MongoDB
REST APIs	Stripe	AI Integration	Data Analysis
Data Visualization	Machine Learning	C++	
Java	Spring Boot	Linux	Agile Lean Ops

HIGHLIGHTS

- End-to-end product delivery: concept → architecture → launch → iteration.
- Analytics-driven decisions bridging engineering and business.
- Enterprise-grade security mindset.

- Built international e-commerce platform (3M SEK annual revenue).
- Performed data-driven market analysis for pricing, supply chain, and payment strategies.
- Implemented BI dashboards improving forecasting and efficiency.

Business Development Manager — Beijing Hualian Group 2014 – 2016

- Analyzed retail data: sales, demographics, seasonal trends for commercial properties.
- Supported investments with foot traffic, forecasting, and lease metrics.
- Collaborated on tenant mix optimization using predictive models.

Business Data Analyst Manager — Carrefour 2013 – 2014

- Collected and analyzed POS data to identify purchasing patterns.
- Built SQL/Excel reports for category management and promotions.
- Optimized inventory, reducing stockouts and overstocking.

EDUCATION

Software Developer — Mobility Services

Folkuniversitetet · 2025 – 2027

- Frontend programming basics
- Git strategies
- Java programming
- Service development
- Backend Java & Spring Boot
- Cloud development
- CI/CD and testing
- Linux introduction
- Python and machine learning

Electromobility Development Engineering (YH)

Teknikhögskolan · 2024 – 2026

- EV motors, batteries, controllers, charging systems.
- Embedded systems for battery management.
- Battery value chain from raw materials to recycling.

Battery Competence Program

Novia University · 2023 – 2024

- Lithium-ion battery performance optimization.
- Sustainable battery manufacturing processes.
